

# THERABEAUTIC

— BEAUTY \* SKINCARE —

## MICROBLADING HOW TO PATCH TEST

1. Wash your hands
2. Clean a small area behind each ear
3. Dip the cotton bud into the pigment provided and place a small amount behind the one ear on the cleaned area and do the same with the numbing cream behind the other ear
4. Leave for 24 hours and keep an eye on it

If you experience ANY itching, raised bumps, redness or other irritation please contact me to discuss.

## TREATMENT DAY

Please bring with you:

- Any pencils or brow powders that you use regularly and consider a good colour match (optional).
- Any pictures or ideas of a brow shape you have in mind (optional).
- Any medication or prescription creams that you use regularly

Paracetamol can be taken half hour before treatment commences but no aspirin or ibuprofen should be taken 24 hours before the procedure. The numbing cream is very effective.

You are welcome to bring your phone or similar with your music and earphones to listen to while treatment is taking place. It acts as a good distraction and will make the time pass quicker. A bottle of water is usually a good idea too.

You will be in treatment for at least 2 hours on your first visit. If you need parking advise, please contact me. Long stay parking available in the Oakmere Park public car park or on The Walk. Please obtain a ticket.

Any other questions please email me at [marinaaspinall@sky.com](mailto:marinaaspinall@sky.com) or text me on 07859-072570.

Thanks, Marina
